The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/597,861	Applicant(s) GIORDANO, GIUSEPPE	
	Examiner Jack W. Lavinder	Art Unit 3677	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 13 December 2010.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 14 has been rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim is missing a structural element that would support the grooves. Currently, there is no element in the claims that provides for the grooves.

The following terms have no antecedent basis in the claim:

"the bracelet length", "the end of their motion", "their maximum elongation", "the desired position", "the desired dimension".

Specification

The abstract of the disclosure filed on 5/28/2010 is objected to because it is more than one paragraph and it fails to be a concise summary of applicant's invention. Correction is required. See MPEP § 608.01(b). A suggestion for the applicant to consider would be to amend the specification to include the exact subject matter submitted in this abstract (filed on 5/28/2010) and resubmit a new single paragraph abstract on a separate page as a summary of the invention. By amending the specification in this way, the congruity between the drawings and the specification would be fixed and the disclosure would be adequate to enable one skilled in the art to make and use the invention.

Allowable Subject Matter

The examiner would like to suggest the following claim for the applicant to consider. This claim would place the application in condition for allowance. The revised claim would read as follows:

15. (new) A safety device for a bracelet including a system for adjusting the circumferential length of the bracelet, wherein the system comprises:

- first and second curvilinear elongated elements, each having a slot and a plurality of notches
- a clasp comprising a third curvilinear elongated element having a set of grooves, wherein the grooves receive one of the first or second elongated elements for slidably gliding the elements relative to one another, and a fourth curvilinear elongated element
- a button slidably secured in each slot of said first and second curvilinear elongated elements to slidably secure said first and second curvilinear elongated elements together
- a set of stop reliefs are provided within said grooves for limiting the sliding motion of the first and second curvilinear elongated elements

wherein the third and forth curvilinear elongated elements are engaged with one another after the safety device is adjusted to a desired position in order to lock the device in that desired position.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
